

# DAVIS-STANDARD®

Where your ideas take shape.

**COST CONTROL**

**PRODUCT INNOVATION**

**UPTIME**

**SPEED-TO-MARKET**

**CUSTOMIZATION**

## Davis-Standard Overview

### Helping make your product ideas real.

Practically speaking, Davis-Standard supplies polymer-processing solutions. But we are really in the making-your-product-ideas-real business. It is not just about providing highly reliable extrusion and converting systems. It is about helping you compete.

It starts with our deep understanding of your needs. It continues with our ability to provide a tailored equipment and service solution to meet those exact needs. Ultimately though, it is because of our responsiveness – to virtually every challenge – that your ideas for better products are more than just a dream. At Davis-Standard, they become reality.

### Maximizing your output. Minimizing your costs.

We serve your needs from a unique perspective. While our competition generally focuses on machine technology, we recognize that is not enough to fulfill your needs. You expect your suppliers to help you during every phase of the product life cycle. And you expect that they will follow through on their promises and honor their commitments. In other words, you need a partner.

That's Davis-Standard. We offer a total solution - a combination of product capabilities and support services that do not simply serve your production goals, but your business goals as well.

When making decisions about your next equipment investment, there is no margin for error. The emphasis has to be on uptime, efficiency and lowest total cost.

**This is where Davis-Standard excels.**

# Davis-Standard Overview

Sheet Systems

Blown Film Systems

Extrusion Coating Systems

## Products and Support

We offer the most complete range of extrusion and converting systems.

- Blow Molding
- Blown Film
- Cast Film
- Elastomer
- Extrusion Coating, Liquid Coating and Lamination
- Fiber
- Medical Tubing
- Pelletizing and Recycling
- Pipe, Profile and Tubing
- Sheet and Foam
- Winding and Unwinding
- Wire and Cable

## Global Locations

You'll find our facilities located in the United States, China, Canada, Finland, Germany, Switzerland, and the United Kingdom; sales representative offices in France, Malaysia, the Philippines, and Russia; and a network of sales agents in almost every major region.

## Markets Served

Davis-Standard converting and extrusion systems are a key component of the value chain within several key markets, such as packaging (flexible, rigid, aseptic, etc.), construction, healthcare, agriculture, automotive, food and beverage, tape and label, and more.

## Technical Development Support

Our aim in developing new extrusion and converting technology is optimizing our customers' product success. R&D capabilities, including a range of comprehensive extrusion and converting pilot lines for testing and proving new applications, enable us to work side-by-side with you to find the best answers for improved efficiency, reduced energy usage and minimum scrap.

## Aftermarket Support

Not only do we tailor our products and support solutions to your needs, we also aim to offer a highly collaborative and worry-free development, installation and training process. We want it to feel like white glove service from beginning to end.

Our 24/7 service hotline, extensive spare parts inventory, and on-site technical services help you avoid costly downtime and boost productivity. Equipment and feedscrew upgrades, gearbox retrofits, L/D conversions, advanced drives and controls are available to support new system performance without a new system price.

We are proud to offer a one-stop, parts and service center for maintaining, reconditioning and retrofitting your machinery. Think of us as your extrusion partner for the life cycle of your equipment. Available around the clock and around the globe.
