Rewind Dual Roll Pusher

Lighten the Load for Increased Productivity

Are you tired of the physical strain of manually unloading large rolls from your slitter rewind? Davis-Standard has the perfect solution – the Rewind Dual Roll Pusher. Say goodbye to the backbreaking work and hello to enhanced productivity!

With our semi-automatic pusher, roll unloading becomes quick and safe, significantly reducing the time spent on manual unloading. But that's not all, our Roll Pusher not only relieves your operators from physical stress but also clears the work area from any trip hazards with its frame-mounted mechanism.

Applications

- Roll handling system must be in place to receive rolls.
- Roll sets over 600 lb. (272 kg.) must be supported at all times to prevent core shaft damage.
- Roll sets over 1000 lb. (453 kg.) can be individually offloaded.

Optimize Productivity

- Reduces roll unloading time
- Can be combined with a roll handling system to further improve efficiency

Safety

- Eliminates the need for manual roll unloading from the slitter rewind, ensuring the safety of your operations.
- Complies with OSHA weight limitations
- The frame-mounted design keeps the operator's work area free from trip hazards
