

DAVIS-STANDARD®

Where your ideas take shape.

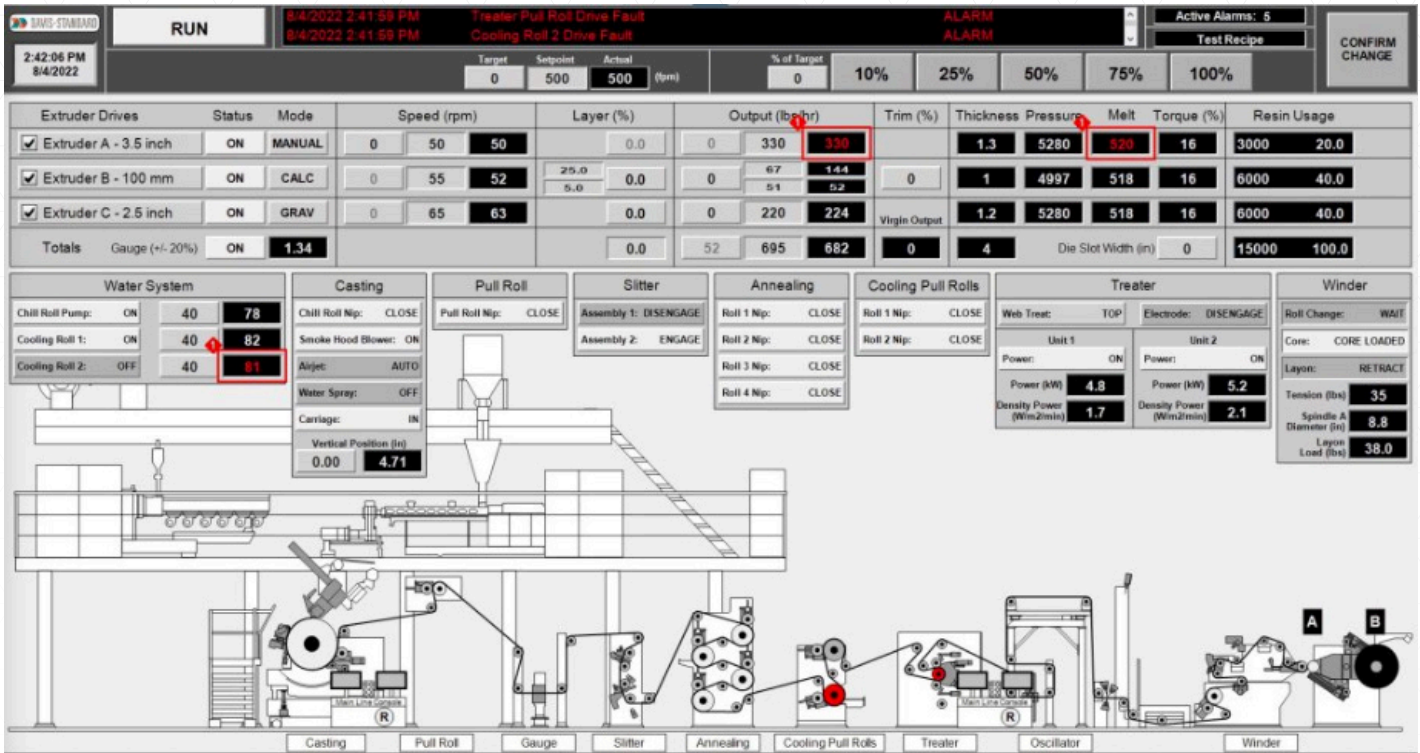

Powerful Connectivity at Your Service – Integrator Pro+™

Overview

The reliable functionality of the Integrator Pro human machine interface (HMI) just got better – welcome to the Integrator Pro+™. Equipped with all the robust features you appreciate in the Integrator Pro, this updated version further facilitates operator accessibility, secure mobility and process efficiency outcomes. The Integrator Pro+™ also supports the DS Activ-Check™ digital transformation platform, which offers a comprehensive suite of analytical tools, cloud and local data storage options and process and equipment technology algorithms. With the Integrator Pro+™, you will enjoy better overall line control, greater connectivity and ease of operation for your high-level blown film, cast film, extrusion coating, drying, solvent and aqueous coating processes.

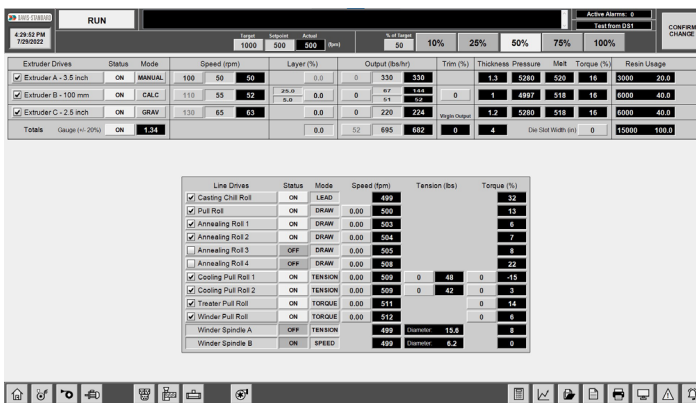

Powerful Connectivity at Your Service – Integrator Pro+™

Valued Advantages

Your converting operation can benefit from:

- The opportunity to integrate the DS Activ-Check™ digital transformation tool
- Central control of all production parameters
- Production data analysis and assistance with overall equipment effectiveness (OEE)
- Compatibility with obsolete controls installed on legacy Davis-Standard machinery
- Omni situational awareness for secure portability of live information to tablets and/or smartphones

Increased storage, troubleshooting and data analysis capabilities

- Process data trending increased to two years (Integrator Pro is one year)
- Minimum of 10 trending screens (Integrator Pro is five screens)
- Minimum of last 1,000 events (Integrator Pro is 500 events)

Ease of use and navigation with an intuitive and improved HMI

- Increased operator accessibility and user-friendliness
- Additional modes of viewing for greater mobility
- Improved graphics and viewing options
- Streamlined visual displays of relevant process information
- Safety overview screen illustrating the status of embedded safety devices to aid in diagnostics and troubleshooting

Carryover of all Integrator Pro features including:

- Recipe Recall
- Temperature, pressure and drive control
- Custom reporting
- Multi-zone tension and splice tracking for winder and unwind
- Material handling and blending interface
- Dryer interface and control
- Line drive functionality
